Surgeon Podiatrist

Orthotics

To help accommodate your individual foot problem, it is highly recommended that we construct custom shoe inserts (orthotics) for you to wear in your shoes.

The orthotics are manufactured especially for you from the cast impressions we will make of your feet. The most durable materials available are using in these individual construction of these inserts.

The fee for custom prescription orthotics days: $300 per pair (CPT L3020)

A deposit of $100 is required on the day of the casting if you do not have coverage. The balance of your payment is due when the orthotics are dispensed.

Please allow approximate 3-4 weeks for the laboratory to manufacture your orthotics. Please call the office the day you are to receive the orthotics to be sure they have arrived.

Many insurance companies do not cover the fee for orthotics. Please understand that in this case, you will be responsible for this service. Please check your individual policy or with your benefit coordinator to be certain.

If you have any further questions, we will be happy to assist you.

☑ **I have read and fully understand the above statement. If I choose to be casted for orthotics, I assume full financial responsibility for any amount insurance does not cover.**

_____ _____

Patient's signature Date

Diagnosis Codes:_____

CPT code: L3020 L3000 A5513
